Man's Right to Work

Out on the roads they have gathered, a hundred thousand men,
To ask for a hold on life as sure as the wolf's hold in his den.
Their need lies close to the quick of life as the earth lies close to
the stone;

It is as meat to the slender rib, as marrow to the bone.

They ask but the leave to labor, to toil in the endless night,
For a little salt to savor their bread, for houses water-tight.
They ask but the right to labor and to live by the strength of
their hands—

They who have bodies like knotted oaks, and patience like sea-
sands.

And the right of a man to labor and his right to labor in joy—
Not all your laws can strangle that right, nor the gates of Hell
destroy.

For it came with the making of man and was kneaded into his
bones,

And it will stand at the last of things on the dust of crumbled
thrones.

UNEMPLOYMENT BENEFITS

(By Richard Hazelton.)

WHEN we have been through a period of trade depression such as we have recently experienced the question of unemployment benefits is sure to be one well calculated to exercise the mind of the average trade unionist. As our members know, the matter of such benefits, in so far as our organization is concerned, has been talked of several times in the past, but no definite action taken.

Unemployment benefits do not seem to be favored as much by American trade unionists as by those of Europe, especially in Great Britain, parts of Germany and continental Europe. In Great Britain unemployment benefits were the forerunner of an extensive scheme of state unemployment insurance which was in full swing at the outbreak of the war.

Not until comparatively recent years have conditions in this country been such as would bring the question of unemployment benefits imperatively before trade unionists but, since 1907, recurring periods of unemployment have brought the practicability of it to the attention of various trade unions. The idea does not appeal to all union men, of course, and there are those who believe that a system of small unemployment benefits does not go reasonably far enough toward lessening the menace of unemployment and urge a direction of energy toward a more equal distribution of work as witness our own organization, which has declared in favor of a six-hour work-day as a means of reducing unemployment to a minimum. However, unemployment benefits, small though they be, are very acceptable to the wage earner who finds himself out of employment with perhaps a young family dependent upon him.

One of the most elaborate schemes of unemployment benefits which has come to

my attention is that which has been perfected by the German Typographical Union, No. 7, of New York City. Its three hundred members pay high dues, 90 cents a week for members working and one-half that amount for members not employed. An assessment of one per cent. of wages is also levied for the upkeep of the national organization. I wonder what would be the feelings of our members if they were obliged to pay such stiff dues? These typos make five dollars a day for a five-day week when employed, and as their business agent, A. Bommerschein, recently remarked: "With these high dues we can lay aside something for the rainy day. The trouble with most union treasuries is that the men don't tax themselves enough when they're at work."

During unemployment the members of this union are well cared for. Men who have belonged to the union for 104 weeks are entitled to sixteen weeks' benefits, those belonging for 200 weeks or over are entitled to an indefinite benefit. A strict supervision of the unemployed is kept and a man is fined four weeks' benefit allowance for refusing a steady job; the penalty for further offenses is more drastic and the chances of deceit being attempted are very slight. The benefits are drawn from two sources in order to protect the local's treasury; first, a man gets an allowance up to a certain amount from the national treasury, next he receives his benefits from the local for a period of three weeks, then he again draws upon the national fund.

By an ingenious plan no member of the union is, however, wholly out of employment, for a system of rotation exists whereby a man after three weeks' employment gives way to one of his unemployed brother unionists. A list of unemployed members is kept from which the man at the top is sent to a temporary position for three weeks after which he drops automatically to the bottom of the list and another takes his place. Several

The Carpenter

temporary positions are often being filled at the same time further reducing unemployment. During the month of January there were twenty-six men on the unemployed list and as a result of this system each had about eleven days' work. Of course, if a job looks like a permanent one a man is sent to fill it indefinitely.

"Big six," the famous typographical union of New York, has also an elaborate system of out-of-work benefits, ranging from \$5 to \$15 according to individual need, through a benefit board. The fund

is raised by special assessment of one-half of one per cent. of the wages of those at work. Last fall, because of exceptionally severe conditions in the printing trade, a heavy assessment of five per cent. on all wages over \$10 raised a revenue of \$20,000 for unemployed members.

The foregoing are interesting instances of what is being done along well-thought-out lines by associations of union wage earners to mitigate the hardships of unemployment.

A PLEA FOR THE EUROPEAN WAR SUFFERERS

THE following communication from Brother Gabriel Edmonston of Washington, D. C., who was the first General President of our organization, was read at the first 1915 session of the General Executive Board. The board members, in

taking action on the communication, expressed themselves in accord with the spirit of Brother Edmonston's suggestion and decided to commend same to the membership for consideration through the columns of *The Carpenter*. The communication reads:

—Relief for the War Sufferers—

Brothers—An opportunity is presented by the European war to demonstrate the value of trade unions on a new line. The widespread calamity that now covers Europe is of such immense proportion that neutral nations are waking but slowly to the task imposed by the cry for help and the humane impulses of our nature.

The innocent victims of a war of such colossal size are in parallel proportions and are numbered by the millions. The organized charities of our land have all they can manage to provide the necessities of life for our own people at this time. Hunger does not stand still on

prospects of a food supply and the time consumed in planning is slowly pinching the cheeks of the innocent sufferers.

We have an organization that is trained to move promptly in a good cause. I am fully persuaded that the 260,000 union carpenters would be glad of an opportunity to help in such an ennobling work. If we give a uniform amount per capita such as the poorest carpenter would be glad to give it would wipe out any distinction as to the amount of individual contribution. We may, with the consent of our Executive Board, voluntarily tax ourselves in any good cause that commands our support that is in harmony with our objects.

"Corporations have no souls," but trade unions have a heart that responds to the teachings of that Great Carpenter, who said: "Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me."

A writer in a recent number of the *Literary Digest*, in describing the flight of the refugees from Antwerp, said: "The clack, clack, clack of the tiny wooden shoes of the children on the road in their weary effort to keep up with the mother was the most pitiful sound I ever heard." That sound came to my imagination and still lingers and lingers. I have never been interested in the question of woman suffrage one way or the other, but I now wonder if this thing could have happened if women of the world

The Carpenter

had had the right to vote. I think not. One such war would put the soldier out of business and make a world's federation in the interests of peace an established fact. I am now too old to lend my feeble energies to that cause, but I hope to accomplish something toward relieving the distress that is now so prevalent in Europe by appealing to my fellow craftsmen who have so highly honored me in the past.

We have in round numbers 260,000 members. I am confident that each member would be glad to give the price of a loaf of bread to the unfortunate victims of the war, especially so when it is shown that the result would be of such respectable proportions. Five cents per capita would amount to \$13,000. This sum would load a ship with 2,600 barrels of flour, or the equivalent of nearly one-half million loaves of bread. To accomplish this purpose in the shortest possible time it will be necessary at the next meeting of all locals to adopt a motion to tax each card five cents and anticipate its payment by an appropriation from the local's treasury and send the full amount without delay to the General Office in Indianapolis. To take the amount out of the locals' funds without this provision to replace it would rob the individual of the satisfaction of giving out of his own pocket and lose the voluntary act of the giver.

All of us would be proud of our National Union if we should send a shipload of breadstuffs to our cousins over the seas designated as the contribution of the U. B. of C. and J. of America to the war sufferers.

GABRIEL EDMONSTON,

First General President of the U. B.
of C. and J. of America.

Use of Wood in Modern Warfare

The extent to which wood enters as a factor into warfare is very likely to be forgotten in these modern days, when submarines furtively seek their prey beneath the waves and aeroplanes and Zeppelin dirigibles meet in deadly combat in the skies. Nevertheless the old ele-

mental material has stood the test of time and the skill of the woodworker is as frequently requisitioned in perfecting modern armaments as it was at any period of the past, very probably even more so.

From the first wooden club used by primeval men to the scientifically correct weapons of the present day is a long stride, says Wood Craft. Frontier log houses were pioneer protection. Dugout canoes preceded the era when, as we are told by tradition, the warriors of Greece went forth on the wooden Argo in search of the golden fleece. Troy was captured by the aid of that mammoth wooden horse that held a daring group of Grecian invaders. Chariots, battering rams, scaling ladders, catapults, slings, gateways, portcullis, drawbridges and other ingenious contrivances of the ancients tell on antique parchment and on many monuments of stone the part contributed by the woodworker to the art of war. McCurdy says that of operations in the field the famous example of Caesar's bridge over the Rhine—completed in nine days—will stand as one of the greatest of feats.

In modern times we have pontoon bridges, timbering for trenches and the making of temporary and other bridges to replace those destroyed by assault of arms. Repairs and renewals of wheels and wagons are continuously demanded in wood. Huts and sheds, as well as their fittings for camps and hospitals, the making of wagons and cases for the transportation of supplies, all these and similar wants call upon the woodworking craftsman. Aeroplanes are largely of wood, walnut and other choice materials being used freely in their construction. Even battleships are not free of this very convenient means of construction, the armor being bolted on to a stout backing of heavy timber, frequently teak.

Show your interest in the affairs of the U. B. in a practical manner by regularly attending the meetings of your local.

Building Trade Prospects

While we will not pretend to deny that there was a good deal of pessimism at the beginning of the year regarding the building outlook, we are glad to report a very welcome change from such an attitude in many different parts of the country. This, no doubt, will be good news to the many building tradesmen who have been the chief sufferers as a result of the great trade depression last year.

Of course, it sounds like the veriest platitude to say that prosperity in the building line depends on the state of the money market to a greater extent than in any other industry. Yet it is well to emphasize that fact. Building operations are almost universally floated on a loan basis today. The fluctuations of the money market either make or mar build-

ing trade prospects and a general financial stringency or any tightening of the nation's purse strings seriously hamper the industry.

Throughout the country, especially in the Middle West, money seems to be loosening up considerably and the banks are lending money much more freely than in the past. Whether the recent currency legislation has been directly responsible for this we are unable to tell; but, at any rate, it has helped to tone up building trade prospects and augurs well for the coming season.

The revival of building operations which were suspended last year should also enter as a factor in making 1915 a record year, as there is a great deal of work of this nature hanging fire. Last month we remarked that the large number of trade movements entered into, and the very successful outcome of a number of them, furnished a good indication of a busy season. This month many more locals have reported satisfactory progress along this line.

It is hardly likely that these favorable indications could be purely artificial, for in addition we have the views of representative bankers, contractors, real estate men and architects, all of which seem to be in accord in believing that a return of prosperity is at hand in the building trade. Our members should, therefore, take heart, especially those who have been discouraged by long periods of enforced idleness. A good busy season's work should put them solidly on their feet again.

New York Day of Rest Law Upheld

We are glad to see that the New York law requiring that employees in mercantile and manufacturing establishments shall have one day of rest in seven has been upheld by the Court of Appeals. The bill, it will be remembered, was

The Carpenter

framed by the American Association for Labor Legislation to meet the necessities of modern industry and requires that workers be given a twenty-four hour rest in each week. The statute differs materially from the Sunday laws in force in the different states and is largely intended to supplement them, for such laws, especially in the older states, are today practically unable to meet the newer conditions existing in our modern industries. The New York law is based upon the theory that all workers, because of the complexity of our modern civilization, cannot avail of the Sunday day of rest but that they are entitled, nevertheless, to a full day of rest in each week in the interest of health and general welfare.

In upholding the constitutionality of the law, the Court of Appeals took an advanced position on that usually taken on the subject of laws regulating the Sabbath, and said:

Can we say that the provision for a full day of rest in seven for such employes is so extravagant and unreasonable, so disconnected with the probable promotion of health and welfare that its enactment is beyond the jurisdiction of the legislature? * * * We have no power of decision of the question whether it is the wisest and best way to offset these conditions and to give to employes the protection which they need, even if we had any doubt on that subject. Our only inquiry must be whether the provision on its face seems reasonable, fair and appropriate, and whether it can fairly be believed that its natural consequences will be in the direction of the betterment of public health and welfare, and therefore that it is one which the state for its protection and advantage may enact and enforce.

The court also stated, as a matter of common observation, that the labor of the classes of employes designated in the bill was generally indoors and imposed that greater burden on health which comes from confinement, many times accompanied by crowded conditions and impure air, and that consequently special conditions were presented which became a reasonable basis for special consideration.

There is in this decision of the New York court an implied willingness to meet existing industrial conditions which

is very refreshing and we only wish that other courts would adopt something of the same frame of mind when passing upon the constitutionality of labor legislation in general. If so, we would find less reliance placed upon moth-eaten legal precedents and obsolete statutes which were never intended for the complex conditions of our modern world, and instead a more frank recognition of the needs of humanity.

The Sixty-third Congress

Among the legislative measures which we should like to have seen passed before the close of the Sixty-third Congress were the Palmer-Owens child labor bill and the Booher-Hughes bill regulating the interstate shipment of goods wholly or in part manufactured, mined or produced by convict labor. As things stood, however, on account of the legislative jam in the Senate during the closing days of the session nothing short of a miracle could have brought them up for final action. This is much to be regretted, as both bills scored notable triumphs in the House of Representatives and their enactment into law would add needed strength to the record of the Sixty-third Congress in the matter of social reform legislation.

The Booher-Hughes convict labor bill passed the House four times, the vote the last time being 302 to 3, and on being sent to the Upper House, the Senate committee reported favorably upon it.

As regards child labor legislation: the Palmer-Owen bill was passed by the House on February 15 by a vote of 237 to 45 despite strong opposition, especially from the southern cotton manufacturers. The small vote against the bill was made up almost wholly of Congressmen from southern States backward in child labor legislation; nine were from Georgia, seven from North Carolina, six from Mississippi, five from Texas, five from South Carolina and three from Alabama. The bill in all probability now goes over to the next Congress, but its triumphant passage by the recent House

-:- Our Principles -:-

Resolved, That we, as a body, thoroughly approve of the objects of the American Federation of Labor and pledge ourselves to give it our earnest and hearty support.

Union-Made Goods

Resolved, That members of this organization should make it a rule, when purchasing goods, to call for those which bear the trademark of organized labor, and when any individual, firm or corporation shall strike a blow at labor organizations they are earnestly requested to give that individual, firm or corporation their careful consideration. No good union man can kiss the rod that whips him.

Labor Legislation

Resolved, That it is of the greatest importance that members should vote intelligently; hence the members of this Brotherhood shall strive to secure legislation in favor of those who produce the wealth of the country, and all discussions and resolutions in that direction shall be in order at any regular meeting, but party politics must be excluded.

Immigration

Resolved, That while we welcome to our shores all who come with the honest intention of becoming lawful citizens, we at the same time condemn the present system which allows the importation of destitute laborers, and we urge organized labor everywhere to endeavor to secure the enactment of more stringent immigration laws.

Faithful Work

Resolved, That we hold it as a sacred principle that Trade Union men, above all others, should set a good example as good and faithful workmen, performing their duties to their employers with honor to themselves and their organization.

Shorter Hours of Labor

We hold a reduction of hours for a day's work increases the intelligence and happiness of the laborer, and also increases the demand for labor and the price of a day's work.

Miscellaneous

We recognize that the interests of all classes of labor are identical, regardless of occupation, nationality, religion, or color, for a wrong done to one is a wrong done to all.

We object to prison contract labor, because it puts the criminal in competition with honorable labor for the purpose of cutting down wages, and also because it helps to overstock the labor market.

Resolved, That we most earnestly condemn the practice in vogue in many cities, but more especially in the West, of advertising fictitious building booms, as it has a tendency to demoralize the trade in such localities.

Casual Comment

The only independent wage earners are those who hold union cards.

* * *

Safety first! Keep your monthly dues paid up. Don't fall in arrears.

* * *

So far, the majority of the spring trade movements entered upon have had very satisfactory results.

* * *

The United Brotherhood needs the assistance and co-operation of every member—good, bad and indifferent. Let's get the lazy ones into line!

* * *

Now that the European belligerents have recently been setting dates for enlarging the war zones, we wish somebody would set a date for increasing the zone of industrial prosperity here at home.

* * *

Good wages, decent working hours, adequate leisure, a comfortable home life and a few staunch friends—these are the things that count!

* * *

If, as old Will Shakespeare used to say: "All the world's a stage, and all the men and women merely players," isn't it about time that all the hard working stage hands were organized?

* * *

It takes efficiency experts quite a long time to learn that genuine industrial efficiency is best obtained and guaranteed by freeing the wage earner from the pinch of economic necessity.

* * *

When you pay a man good wages he ceases to worry over the vital problem of "making ends meet" and consequently puts much more of himself into his work.

* * *

If in the course of human events the distinctively Hibernian significance of St. Patrick's day should ever be forgotten we

might continue to observe it as a sort of industrial holiday in commemoration of the part played by "the fighting race" in the struggle for industrial freedom.

* * *

The fellow who is lax in attending the meetings of his local should not fool himself with the thought that "they also serve who only stand and wait."

* * *

Much more is expected of him. The bona fide union man is he who is active in the affairs of his local, reasonably regular in attending the meetings and prompt in paying his dues.

* * *

Talk about State Council Conventions! The Pennsylvania gathering which opened in Pittsburgh on February 15, was the greatest ever. After a look in at the office of the "Iron Trades Review" and a shake-hands from W. J. Kelly, a number of delegates were for changing the name of the city from Pittsburgh to Kellyville. Pittsburgh sounds so smoky anyway.

* * *

Another rousing State Council gathering was held at Stamford, Conn., in the closing days of last month when the Connecticut boys, in convention assembled, discussed plans looking toward a bigger and better state organization. It seemed to be the conviction of most of the delegates that there is a prosperous season ahead for the members of our organization. The U. B. is in good condition in Connecticut and came through the recent period of trade depression in good shape.

News Notes from Local Unions

Concord, N. H., L. U. 538.—Very dull trade conditions are being experienced in Concord and vicinity at the present time and future prospects are not encouraging. Traveling brothers will serve their own interests best by staying away.—James Burbeck, R. S.

* * *

Beaver Valley and Vicinity D. C.—Traveling brothers are notified that work is very scarce in Beaver Valley and vicinity at the present time. Prospects are anything but favorable. The majority of our members are out of employment. Outsiders are urged to stay away.—J. L. Worstell, Secretary of D. C.

* * *

Orilla, Ont., Can. L. U. 1607.—It has been decided to have Orilla placed upon the list of localities to be avoided as there is a great scarcity of work here at present and the outlook for the coming months is not very promising.—Patrick Heslin, R. S.

* * *

Marquette, Mich., L. U. 958.—Work at the trade is very slack here at present, the only jobs of importance being the Orphans' Home and the main building of the Northern State Normal School, both of which are non-union. This local also intends to start a movement for an eight-hour day in the near future. Traveling brothers are asked to stay away.—William Henry, R. S.

* * *

Amherst, N. S., Can., L. U. 1879.—Traveling brothers are requested to avoid Amherst. Things are very dull at present in the building line in Amherst and throughout the province of Nova Scotia to a large extent. R. Rafues, R. S.

* * *

Berlin, Ont., Can., L. U. 553.—Bad conditions in the trade here compel us to ask all traveling brothers to stay away from the vicinity of Berlin. Only a few

of our members are employed. During the months of December and January a year ago building permits amounting to over \$17,000 were issued, while for the same period this year they only amounted to \$1,200 for alterations. The war and the tight money market have contributed to keep building operations at a standstill. J. Reid, Sec.

* * *

Quakertown, Pa., L. U. 1204.—Owing to bad trade conditions, traveling brothers should avoid the towns of Sellersville and Souderton, Pa. There is very little doing there in the building trade and prospects for the future are not good. O. R. Miller, R. S.

* * *

Bismark, N. D., L. U. 663.—There is very little doing in the building line in Bismark at present and L. U. 663 requests traveling brothers to stay away until a change for the better ensues. C. A. Carlson, F. S.

* * *

Denton, Texas, L. U. 1526.—Traveling brothers have been coming into Denton of late as a result of misleading newspaper advertisements, and we are therefore prompted to advise all brothers to stay away, as there is little work to be had here. This is the first time we have been obliged to insert a stay-away notice in The Carpenter. R. C. McCormick, R. S.

* * *

Wauchula, Fla., L. U. 1086.—Not more than one-fourth of the members of L. U. 1086 are employed at the present time and the outlook for work is extremely poor in this section of Florida. Traveling brothers will serve their own interests best by keeping away from the neighborhood of Wauchula. C. E. Benham.

Another Ladies' Auxiliary Formed

A ladies' auxiliary, under the auspices of L. U. 420, of Memphis, Tenn., was formed on January 6, when the Memphis Carpenters' hall was filled to overflow with members of the allied building trades and their wives, daughters and sweethearts. The meeting was a most enthusiastic one and augurs well for the future of unionism in Memphis. Among those who spoke and outlined the purposes of the meeting were, the Rev. Mr. Cox of the Central Baptist Church; Miss Lothe Burke, principal of the Riverside School; J. P. Kranz, of the Associated Charities; C. M. Dayton, of L. U. 420; A. A. Waddell, of the Engineers; William Stephens, of the Bricklayers, and H. G. Terlisner, chairman of the allied crafts of Memphis. In addition to the interesting speeches, which contained sound trade union philosophy, there was plenty of good coffee and cake, enjoyable music and dancing. The affair was a pronounced success in every particular and L. U. 420 came in for a great deal of praise for starting the good work among the women. The Memphis Ladies' Auxiliary starts out with a membership of fifty.

Canton Union Carpenters

L. U. 143, of Canton, O., held a big open meeting on the evening of February 22, as part of the effort which is being put forward to organize the non-union carpenters of the city. The principal speaker was Allen Cook, a well-known figure in the labor movement in Canton and vicinity, who delivered a rousing address which was very well received. Brother T. J. Dolan, of Cleveland, was another speaker and he very interestingly discussed the status of the U. B. members in Canton and Cleveland. He appealed to non-union carpenters to get into line and take their rightful place in the ranks of the organized wage earners. A very pleasing lunch was served on the occasion by the entertainment committee which consisted of Brothers Bearinger,

Bock, Herr, Nauman and Keyes. There was also a very enjoyable program of several musical numbers. The organizing propaganda in Canton is meeting with a great measure of success and is expected to have a favorable influence on the spring trade movement which was recently launched.

L. U. 912 Active

The Richmond, Ind., Labor Herald recently contained a sketch of the growth of the U. B. and a short history of L. U. 912, of Richmond, written by C. A. Griffy, the recording secretary of the local. The local was chartered in September, 1901, and today has an 80 per cent. organization of the best carpenters in Richmond.

A Big U. B. Night in Cleveland

The thirty-second anniversary celebration and ball of the Cleveland (Cuyahoga county) D. C. was held in the Moose hall, Walnut street, Cleveland, on the night of February 4, and proved a most enjoyable affair in every particular. The annual celebration of the carpenters has come to be regarded as the biggest social event of the year in Cleveland labor circles and this time broke all former records. The floor arrangements were perfect, the music delightful, the girls dreams of lingerie and loveliness; in short, all who attended were out for a good time—and they got it.

In connection with the event the D. C. issued an attractive souvenir program with the U. B. label well in evidence in the cover design. Among the interesting features of its contents were a brief history of the U. B. in Cleveland by Thomas J. Dolan, several other interesting articles and a number of exceptionally good photographs of Clevelanders who are prominent in the affairs of the U. B. Both the celebration itself and the souvenir program reflect credit on the Cuyahoga county D. C.

The Women's Trade Union League

The fifth biennial convention of the National Women's Trade Union League of America will be held in New York city during the week beginning Monday, June 7. The call for the meeting, issued by the president of the league, Mrs. Margaret D. Robins, emphasises the presence of women as a strong factor in our industrial life and urges the necessity of organizing the great mass of women wage earners. The problem of unemployment, says Mrs. Robins, is flinging us a sterner challenge, and this condition of idle workers brings into bold outline the effects of unorganized women in industry. The danger of women being used as underbidders in an increasing number of trades must be squarely faced. There is only one woman among the hundreds of thousands, forced to earn a living by grim economic pressure, who will refuse to take the place of a man for lower wages. This is the organized woman, who recognizes the fundamental necessity of standing with men in the demand for equal pay for equal work.

Information Wanted

This is a photo of Edmund Heyne, a member of L. U. 238, of Philadelphia, Pa., who has been missing from his home

in that city since January 2. Heyne is 54 years of age and stands 5 feet 9 inches in height. He is of dark complexion; his hair and mustache are tinged with gray, and he weighs 175 pounds. At the time of his disappearance he wore gray

trousers, black sweater, blue overcoat and a gray soft hat. He leaves a wife and six children. Any information concerning him should be addressed to them at 950 North Lawrence street, Philadelphia, Pa.

* * *

Information is wanted concerning Emil Schmelter, a member of L. U. 1134 of Mount Kisco, N. Y., who left his wife and children in September, 1914, and has not been heard from. Any U. B. member who knows his whereabouts will confer a great favor on L. U. 1134 by communicating with Financial Secretary Fred Christensen, Mt. Kisco, N. Y.

The Sixty-third Congress

(Continued from Page 8.)

is a good indication of final victory for it is altogether likely that the next Senate will be favorably disposed toward this much needed legislation.

The attention devoted to the Mexican trouble and the war in Europe are blamed for the inability of Congress to devote more consideration than it actually did to remedial labor legislation. The passing of such an important measure as the Clayton bill, with its epoch-making labor provisions, was in itself a feat that eclipsed the labor record of more than one session in the past, but it should not indirectly cause a slackening of interest in other legislation of much benefit to the wage earners of the country. It is to be regretted, therefore, that the two bills we have referred to were not disposed of at the session recently closed. Both would have brought about remedial social legislation which is sorely needed; and even if they are sure of being enacted by the next Congress, it is irksome to have to wait so long to remedy the evils arising from child labor and the misdirection of convict labor.

Sooner or later an adequate scheme of colonization as a means of bringing the surplus population of our cities back to the land will have to be adopted.

Trade Notes

Successful Trade Movements

La Salle, Ill.—A communication has been received from Secretary-Treasurer E. E. Rose, of the Illinois Valley D. C., reporting the success of the trade movement entered into by L. U. 631 of Spring Valley. An agreement has been signed with the contractors which specifies a raise in wages from 50 cents to 55 cents per hour. This increase was obtained without a protest. The new scale goes into effect April 1.

* * *

Caney, Kan.—The trade movement started by L. U. 1676 to establish a foreman's wage scale of 50 cents per hour has been successful.

* * *

Niagara Falls, N. Y.—The contractors here signed our new agreement upon the expiration of the old one, April 1. Only a few minor changes were specified in this year's agreement which were readily acceded to and the best feelings exist between the bosses and men. We have a minimum scale of 50 cents per hour and an eight-hour day, with a Saturday half-holiday during the months of June, July and August.

* * *

Portland, Ore.—The members of L. U. 872 (bridge, dock and pier carpenters) report gratifying progress in their movement for an eight-hour day. Assurance has been received from two of the largest firms, the Portland Bridge and Building Company and the Elliott Construction Company, that they are in sympathy with the demand and will grant the required reduction in working hours.

Movements for Better Conditions

L. U. 772, Clinton, Ia.—A demand for a minimum wage of fifty cents per hour, same to become effective May 1, is being

made by the Clinton union carpenters this year. The movement has been sanctioned by the G. E. B., and it looks at this time that the contractors will comply with our demands.

* * *

L. U. 1339, Morgantown, W. Va.—The G. E. B. has sanctioned the trade movement which has been started by L. U. 1339, which calls for a minimum wage of 40 cents per hour beginning May 1. The scale at present is 36 cents per hour for a nine-hour day, and a 53-hour working week. The prospect of obtaining this demand seems good and we are not likely to have to strike to get it.

* * *

L. U. 135 and 1680, Allentown, Pa.—The members of these two locals have presented to the contractors and builders of Allentown an agreement to take effect May 1, which calls for a minimum wage of 37½ cents per hour. Present wages are 35 cents per hour, and the working hours nine hours per day with five-hour day on Saturdays. Conditions in the trade are good and we expect to obtain our demands without trouble.

* * *

L. U. 358, Tipton, Ind.—A trade movement has been started by the Tipton local this year demanding a minimum wage of 40 cents per hour and a nine-hour day for journeymen carpenters and a wage of 35 cents and a ten-hour day for mill men. The current wages of outside carpenters are 37½ cents and they have a nine-hour day. The new scale is to become effective April 1. Conditions in the trade are fairly good and we do not expect trouble in having our demands complied with.

* * *

L. U. 1444, Phoenixville, Pa.—This local union by unanimous vote decided to start a trade movement for an increase

The Carpenter

in wages of five cents per hour, which would bring the current scale to 40 cents, same to take effect May 1. Working hours are nine per day and 50 per week. Conditions in the trade are favorable and the prospects of success are good.

* * *

L. U. 682, Franklin, Pa.—As our agreement with the contractors expired April 1, we have submitted a new one which calls for a minimum wage of 45 cents per hour, or \$3.60 per day. Current wages paid average from 39 3-8 cents to 43 3-4 cents, and we have an eight-hour day. We intend the new scale to take effect at once. Conditions in the trade seem good for spring work and the prospects of obtaining our increase are favorable.

* * *

L. U. 978, Springfield, Mo.—This local has decided to start a trade movement for an increase in wages of five cents per hour dating from June 1, 1915 to June 1, 1916. Current wages are 45 cents per hour and we have a 44-hour week. We have every reason to believe that our demand will be favorably entertained by the contractors.

* * *

L. U. 1780, Fairbury, Ill.—A trade movement for a nine-hour day and a minimum wage scale of 40 cents per hour has been started by the members of this L. U. Present wages are on a sliding scale from 30 to 35 and 40 cents and working hours are ten a day. Conditions in the trade in this district are fair and the prospects of obtaining our demands are good.

* * *

L. U. 1129, Kittanning, Pa.—The members of this local are asking a minimum scale of 50 cents per hour for an eight-hour day, same to become operative on May 1. Present wages are 37½ cents per hour and working hours eight per day. Trade conditions are good and we do not anticipate trouble in having our demand complied with.

* * *

L. U. 637, Hamilton, O.—This local has submitted a new agreement to the con-

tractors which calls for an increase of five cents per hour, same to take effect May 1. The present rate is 45 cents per hour and working hours are 48 per week. Conditions in the trade are not altogether favorable, but the prospects of obtaining our demand are reasonably good. The agreement will be binding for two years.

* * *

L. U. 661, Ottawa, Ill.—An increase of wages of five cents per hour to take effect April 1, is the extent of our 1915 trade movement. We are at present receiving 45 cents per hour and working hours are eight per day. This promises to be a good building year in this locality and the prospects of gaining our demands are favorable.

* * *

L. U. 822, Findlay, O.—An increase in wages from the current rate of 33 1-3 cents per hour to 35 cents per hour is being demanded by the union carpenters of Findlay from the contractors, new scale to become operative April 1. Working hours are to remain the same, nine per day. We cannot complain of trade conditions and we anticipate little difficulty in obtaining this needed increase.

* * *

Erie, Pa.—(District Council of Erie County).—After due deliberation, the union carpenters of Erie County have decided to start a movement for a closed shop. The present rate of wages is 45 cents per hour and an eight-hour day. Conditions in the trade are not of the best, but the prospects for spring are good and there is every reason to expect that the movement will be successful. All the fair contractors employ only union men.

* * *

L. U. 462, Greensburg, Pa.—A trade movement has been instituted here calling for an increase in the wage scale from the current rate of 40 cents to 50 per hour, same to take effect April 1. While conditions in the trade are none too good, spring prospects seem favorable and no trouble is anticipated in having our demand complied with.

Pleasure as An End

The man who chooses pleasure as the object of his life has no real haven, but is like a boat that beats up and down and drifts and drifts to and fro, merely to feel the motion of the waves and the impulse of the wind. When the voyage of life is done he has reached no port; he has accomplished nothing.—Henry Van Dyke.

Trade unionism builds not only for the immediate present, but for all time—remember this when paying your dues.

The First Result Of Training

More money is not the *only* result of training but it's the *first* and a mighty important result.

The carpenter who draws his pay whether business is good or bad is trained to *think* and *plan*—he can take hold of a job as foreman, supervise every detail, and complete the job on scheduled time.

The contractor who pulls down the most money is trained to figure *close* and *correctly*—he doesn't figure too high and lose the contract; nor does he get the job and lose money on it because he figured too low.

YOU can train yourself for a steady job as foreman. You can learn how to handle jobs by contract. You can learn to design and draw the plans and get the fat fees of the architect.

Reinforce your practical experience with a little systematic training such as you can get through the Builders' Courses of the International Correspondence Schools and you can easily increase your earnings or build a profitable business as a contractor or architect.

In justice to yourself the least you can do is to get the particulars of this System of Home Instruction, and in the quiet of your own home find out how it will help you.

Just mark and mail the attached coupon—full particulars will come by return mail.

Never before has anything like this been attempted. Dealers get \$3.00 a month rent for this make of machine, not nearly as perfect as the one we will send you, and you pay only **TWO DOLLARS A MONTH AND OWN IT.**

A - GUARANTEED - TYPEWRITER - \$28.80

SEND THE COUPON AND WE WILL SHIP YOU THIS SMITH-PREMIER TYPEWRITER

When the typewriter arrives, deposit with the express agent \$8.80 and take the typewriter three days and try it. If you don't want to keep it, return it to the express agent, and he will give you back your \$8.80, and return the typewriter to us. I will pay the return express charges. You won't want to send this machine back after you have seen it and tried it. You can't imagine the perfection of these machines till you see one, and it is guaranteed just as if you paid \$100.00 for it.

The supply at this price is very limited, the price may be raised when next advertisement appears, so don't delay. There is no red tape. I employ no solicitors—no collectors—no chattel mortgage. be obtained by an apprentice as by a master carpenter. **TO USE:** turn the number on the anvil corresponding to the number of saw points to the inch of the saw to the arrow-head, run up the gauge screw until the saw just passes through without binding, and set the saw in the usual way.
